

MGT 448: All Hazards Planning for Animal, Agricultural, & Food Related Disasters 8hr ift

This management level course will provide the background information needed to lead a multi-agency team of emergency planners in the development of an Emergency Support Functions (ESF) annex for food and/or animal related disasters to supplement their community's existing Emergency Operation Plans. The course will address topics such as agroterrorism; detection and diagnosis; the unique challenges that rural communities face in planning for and responding to food and/or animal related disasters; utilization of ESF; recovery and the importance of sustainable operations during a disaster event; and mapping a community to identify areas of vulnerability and resources. All content will be presented at an all-day instructor led training that will include presentations and problem-solving activities that will be completed in small groups.
